PROFILE SUMMARY

Results-driven DevOps Engineer with **2 years** of hands-on experience building and managing cloud infrastructure across **AWS**, and **GCP**. Strong background in automating **CI/CD** pipelines with **Jenkins**, containerizing applications using **Docker** and **Kubernetes**, and provisioning infrastructure with Terraform. Known for improving deployment speed by 40% and cutting cloud costs by 15% through smart automation, performance tuning, and efficient resource management.

SKILLS

Cloud Platforms:

- **AWS**: EC2, S3, IAM, VPC, Auto Scaling, CloudFormation, CloudWatch, EKS, ECR, RDS, Lambda, Secrets Manager, AWS DevOps
- **Google Cloud Platform**: Compute Engine, Cloud Storage, Cloud SQL, Cloud Pub/Sub, Cloud IAM, Service Accounts, Virtual Private Cloud (VPC)

Version Control Tools: **Git(GitHub)**

Continuous Integration: **Jenkins**

Iaas: **Terraform**

Configuration Management: **Ansible**

Build Tools: **Maven**

Monitoring & Logging: **Prometheus, Grafana, Loki**

Operating Systems: **Linux, Windows, Ubuntu**

Security & Scanning: **SonarQube, Trivy**

Scripting: **Bash, Python**

Web App Servers: **Nginx, Apache**

Containerization: **Docker**

Orchestration: **Kubernetes**

EXPERIENCE

Adaequare Info Pvt Ltd | Graduate Engineer Trainee | Feb 2024 - Oct 2025

Infrastructure Automation & CI/CD | Client: Cotality

Feb 2024 - Oct 2024

- **Developed and maintained Terraform configurations** to provision **AWS resources** such as **VPCs, EC2 Instances, IAM roles, Security Groups and S3 Buckets** across multiple environments, improving infrastructure consistency by **35%**
- **Built Jenkins CI/CD pipelines for Java applications** integrating **Maven builds, Nexus artifact** uploads, versioning strategies, and automated deployment stages to internal EC2 environments.
- **Created Bash and Python validation scripts** for deployment verification, application health checks, log inspection, and rollback safety, enabling early fault detection and reliable release quality.
- **Implemented Terraform best practices** including **modularization, remote backend state management, and version control**, ensuring **error-free, repeatable deployments** and simplifying team collaboration.
- **Automated AWS infrastructure provisioning using Terraform**, increasing deployment speed and reducing manual configuration errors.
- **Integrated Terraform and Ansible within Jenkins pipelines**, automating end-to-end provisioning and **post-deployment configurations**, which cut setup time by **40%**.
- **Created and optimized Dockerfiles** for lightweight **Jenkins build agents** on **Ubuntu**, enhancing CI/CD pipeline scalability and performance.
- **Developed Ansible playbooks** for software installation, system setup, and configuration management, dynamically fetching VM inventories using Instance labels and tags.
- **Version-controlled Terraform and Ansible scripts in Git**, maintaining **transparency, traceability, and reusability** of automation code across projects and teams.

- Supported internal **AWS EKS cluster configurations**, setting up Ingress routing, LoadBalancer rules, TLS automation, and microservices accessibility across namespaces.
- Implemented **cert-manager with Let's Encrypt** for automated certificate management, strengthening platform security and reducing manual renewal overhead.
- Deployed an end-to-end observability stack using **Prometheus, Grafana, Loki, Promtail, Node Exporter, and cAdvisor**, enabling real-time performance insights and centralized logging.
- Configured **IRSA (IAM Roles for Service Accounts)** and **AWS EBS CSI Driver-based StorageClasses** to enable secure pod-level access and dynamic volume provisioning. Worked with **Kyverno policies** to enforce Prometheus resource standards and maintain consistent observability configurations across namespaces.
- Performed Kubernetes workload validation including pod health checks, log-based debugging, manifest corrections, and Helm release updates to ensure stable application behavior.
- Improved issue resolution speed by **~25%** through structured monitoring dashboards and unified log pipelines, reducing manual troubleshooting effort.
- Documentation: AWS EKS Stack Monitoring

CERTIFICATIONS

[Nasscom AWS Cloud Solution Architect Associate](#)

EDUCATION

B.E. Electronics & Communication Engineering | 2019 – 2023

Panimalar Institute of Technology, Chennai | CGPA: 8.32

TRAINING & FOUNDATION WORK

DevOps Training, Naresh i Technologies, Hyderabad

07/2023 – 01/2024

- Hands-on labs on AWS, Jenkins CI/CD, Terraform, Docker, Ansible.
- Completed NASSCOM AWS Solution Architect Associate certification.

Python Internship, Shiash Info Pvt Ltd, Chennai

02/2023 – 04/2023

- Built basic automation scripts, practiced Python fundamentals and debugging.
