PROFILE SUMMARY

Cloud & DevOps Engineer with hands-on experience in **infrastructure automation, CI/CD pipeline development, Docker-based Jenkins agents, Terraform provisioning, and Kubernetes environment setup**. Skilled in configuring internal cloud environments across AWS & GCP, automating deployments, and improving reliability through observability stacks. Strong focus on internal implementation, validation, and DevOps workflow automation.

TECHNICAL SKILLS

Cloud — GCP (Compute Engine, IAM, VPC, Cloud SQL, Secret Manager, Cloud Storage, Pub/Sub) | | AWS (EC2, VPC, S3, IAM, EKS setup, ECR, ECS, Cloud watch, RDS, Lambda, Route53, CloudFront, Auto Scaling), **IaC & Automation** — Terraform, Ansible, **CI/CD & Build Tools** — Jenkins, GitHub Actions, Maven, **Containers & Kubernetes** — Docker, Kubernetes (Ingress, cert-manager, Kyverno, internal EKS setup), **Version Control** — Git, GitHub, **Monitoring & Logging** — Prometheus, Grafana, Loki, Promtail, cAdvisor, Node Exporter, **Security & Scanning** — SonarQube, Trivy, Kyverno, **Scripting & OS** — Python, Bash, Linux (Ubuntu/RHEL), Windows Server, **Artifact storage** — Nexus, Google Artifact Registry

EXPERIENCE

Adaequare Info Pvt Ltd, Cloud & DevOps Engineer 02/2024 – 10/2025 | Hyderabad, Telangana

Infrastructure Automation & CI/CD Development (Internal Implementation)

- Automated **GCP infrastructure components** using Terraform modules for VPC, subnets, firewall rules, IAM roles, and Compute Engine provisioning in internal environments.
- Designed and developed **CI/CD pipelines** using Jenkins, Maven, and Nexus for Java-based application deployments.
- Built **Docker-based Jenkins agent images** preconfigured with Terraform, Ansible, Maven, Python, and cloud CLIs to standardize pipeline execution.
- Implemented **Ansible automation** for VM configuration, Java setup, application folders, and deployment prerequisites.
- Developed Python and Bash scripts for validation, log checks, health checks, and deployment integrity verification.
- Improved internal provisioning and deployment efficiency by **~35%** through module standardization and automated pipelines.
- Troubleshoot build issues, Terraform validation errors, IAM permission problems, Nexus uploads, and deployment failures.
- Maintained internal documentation covering pipeline workflows, agent structure, Terraform modules, and troubleshooting steps.

AWS EKS Platform Implementation & Operations Support

- Worked closely with a senior DevOps engineer to validate and configure an internal EKS environment designed for the CODA client's AFRA project.
- Configured **AWS EKS cluster**, Ingress rules, LoadBalancer settings, and routing for application paths.

- Integrated **cert-manager** with Let's Encrypt for automated TLS certificate generation and renewal.
- Deployed observability stack components:
 - **Prometheus** for metrics
 - **Grafana** for dashboards
 - **Node Exporter & Kube-State-Metrics** for cluster visibility
 - **cAdvisor** for pod-level metrics
 - **Loki + Promtail** for centralized logging across nodes and pods
- Validated deployments, performed pod health checks, debugging using logs, fixing faulty Helm releases, and correcting Kubernetes manifests.
- Helped reduce manual debugging time by ~25% through centralized monitoring & logging systems.

PROJECTS

GCP Infrastructure Automation & Java Deployment,

06/2024 – 09/2024

Internal Implementation

Automated VPC, subnets, IAM, firewall rules, and VM provisioning using Terraform. Developed internal CI/CD pipelines using Jenkins, Maven, Nexus, Docker-based agents, and Ansible for deployment configuration. [↗](#)

Tech [↗](#) : Terraform, Jenkins, Maven, Nexus, Docker, Ansible, GCP

Documentation: GCP Infrastructure Automation [↗](#)

AWS EKS Platform Implementation & Operations

02/2025 – 09/2025

Support, Project: AFRA | Client: CODA

Configured internal EKS environment components including ingress routing, TLS automation, Prometheus-Grafana dashboards, and Loki-Promtail logging. Supported workload deployments and Kubernetes troubleshooting.

Tech: AWS EKS, Kubernetes, Helm, Prometheus, Grafana, Loki, Promtail

Documentation: AWS EKS Stack Monitoring [↗](#)

EDUCATION

B.E. Electronics & Communication Engineering,

2019 – 2023

Panimalar Institute of Technology, Chennai

CGPA: 8.32

CERTIFICATE

- Nasscom AWS Cloud Solution Architect Associate [↗](#)

TRAINING & FOUNDATION WORK

DevOps Training, Naresh i Technologies, Hyderabad

07/2023 – 01/2024

- Hands-on labs on AWS, Jenkins CI/CD, Terraform, Docker, Ansible.
- Completed NASSCOM AWS Solution Architect Associate certification.

Python Internship, Shiash Info Pvt Ltd, Chennai

02/2023 – 04/2023

- Built basic automation scripts; practiced Python fundamentals and debugging.
